## GENERAL OFFERING #3

## SEEDLINGS IN COMMUNITY AND INDIVIDUAL POTS

Explanation of Policy - Please read carefully.

PARENTAGE FORMS. Parentage forms will be furnished without charge with the purchase of any of our hybrid seedlings. These forms give the complete ancestry of the hybrid, and provides the customer with a convenient reference to the parentage of Rivermont Hybrids.

SEEDLINGS IN COMMUNITY POTS. Our hybrid seedlings are planted in communities of approximately 5 to 15 plants per pot. The plants are approximately two years old from seed and are in need of transplanting within three months. The price shown on the offering is the price per plant. Since they are in communities we cannot accept an order for less than 10 plants of any one cross. We can only approximate your order since it is not always possible to find a pot containing exactly the same number of plants you may request.

SEEDLINGS IN INDIVIDUAL POTS. These seedlings are in individual pots and they may be purchased in any quantities unless purchase limitations are specified.

SUBSTITUTIONS. We would like to have our customers give us a second choice to be sent in the event we are sold out of plants of their first choice. No substitutions of a different cross are made unless authorized.

BACK ORDERS. In the event that we are permanently sold out of a cross when your order is received you will be advised. If a second choice is specified, it will be shipped. If we are temporarily sold out of a cross you request, your order will be back ordered and the plants shipped when they are ready.

PAYMENT. Please DO NOT include payment with your order. Payment should be made upon receipt of our invoice or upon acknowledgment of your order. Prices shown are in U. S. dollars F.O.B. Chattanooga.

SHIPMENTS. U. S. shipments will be made by Railway Express unless otherwise requested. All foreign shipments will be sent by Air Mail or Air Express depending on weight, unless otherwise requested.

FIBRE POTS. For the benefit of our foreign customers we are prepared to ship your plants in fibre pots without any extra charge. This will result in saving of from \$0.25 to \$0.50 per pot on mail or express charges. The plants should be repotted into clay pots within about 2 or 3 weeks. Plants will be shipped in clay pots unless otherwise requested.

<u>Cross Number</u>		<u>Price Per Plant</u>
R-706	<p>C. PETALENA, alba x BLC. NANETTE, alba</p> <p>A fine white with colored lip to bloom in the fall. Large plants and vigorous growers.</p> <p>C. Petalena (C. Enid x C. Peetersii). Heavy pure white petals and sepals, white lip with a rose tip and yellow eyes.</p> <p>Blc. Nanette (Blc. Everest x C. Annette). Heavy white petals and sepals with large fringed lip having a tiny splash of purple on tip.</p>	\$1.50
R-708	<p>C. BOW BELLS x C. CELIA, var. Rivermont</p> <p>A fine cross between two well-known pure whites. The resulting fall blooming hybrid should be a sturdy grower combining the fine qualities of Bow Bells with the snug shape of Celia.</p> <p>C. Bow Bells (C. Edithiae, White Empress x C. Suzanne Hye). One of the finest Bow Bells we have ever flowered.</p> <p>C. Celia (Same as parent of R-675)</p>	2.00
R-728	<p>C. MONMOSS x BC. WARNHAM BEAUTY, A.M., R.H.S.</p> <p>The C. Monmoss parent (C. Mossiae x C. Monarch) has a four year record of good and very good blooms in March.</p> <p>Bc. Warnham Beauty, A.M., R.H.S., (Bc. Digbyano-Mossiae x C. Tityus) is winter flowering, having large sized heavy textured blooms. Lip is bright rose with ruffled edge. These seedlings were grown for flower production in February and March.</p>	1.25
R-731	<p>C. MONMOSS x LC. NELSON</p> <p>Dark lavender flowers are expected here to bloom in the winter months when good lavenders are scarce. The fine shape of both parents should predominate. Large vigorous growing seedlings.</p> <p>The Lc. Nelson (Lc. Windermere x C. Syros) used inherited the wide heavy textured petals of Windermere, and should combine well with the lovely shape of Monmoss.</p>	1.00
R-733	<p>C. MOSSIAE WAGNERI x C. TRIANAE, Broomhill's variety</p> <p>The C. Mossiae, Wagneri is beautifully shaped because of its rounded petals. The lip is white with yellow center and the petals are pure white. It flowers in May.</p> <p>C. Trianae, Broomhill's var. is the parent of many fine pure white hybrids. It flowers in January or February.</p> <p>This cross C. Trimos, alba has shown itself a vigorous grower. The pure white flowers should be most profuse in March and April.</p>	1.25
R-738	<p>C. ELEANORE, alba x C. HAROLD, alba</p> <p>A lovely white with colored lip that is expected to bloom in June.</p> <p>C. Eleanore (C. Hardyana x C. gigas, F.M.B.) is a large flower with heavy pure white petals and sepals and a lovely rose lip with yellow eyes.</p> <p>C. Harold (C. gigas x C. Gaskelliana). Large flowers of fine shape and good substance. Petals and sepals are pure white. The lip is long and graceful with a deep rose tip and fringed with white. The throat has a bright yellow center.</p>	1.50

<u>Cross Number</u>		<u>Price Per Plant</u>
R-739	C. IORANORE x C. HAROLD, alba A lovely spring blooming white with colored lip that is expected to bloom in June. C. Loranore (C. Eleanore, alba x C. Lorna). A good growing plant producing lovely large flowers of good form and texture. The petals are pure white. The rose lip is long and graceful with a bright yellow center. C. HAROLD (Same as parent of R-738)	1.50
R-753	C. DIONYSIUS, alba x C. HAROLD, alba A spring blooming white with colored lip that is expected to bloom in June. C. Dionysius (C. Fabia x C. gigas, F.M.B.) Large flowers of lovely shape. Petals and sepals are pure white. The lip is long and has a rose tip that is outlined with a tiny white border. C. Harold (Same as parent of R-738)	1.50
R-754	C. GRETCHEN MERRILL x C. MINNEHAHA, var. Rivermont A fine pure white expected to flower in March. Exceptionally fine vigorous seedlings. Our description of these parents is as follows: C. Gretchen Merrill. 3 flowers. Pure white, well shaped very heavy petals $2\frac{1}{2}$ " wide, $6\frac{3}{4}$ " spread. Lip lovely shaped with ruffled edge and yellow center. C. Minnehaha, var. Rivermont. 3 flowers. Pure white petals $3\frac{1}{2}$ " wide, $8\frac{1}{4}$ " spread. Large white lip with yellow center.	1.25
R-781	C. BOW BELLS x C. SNOW SONG, var. Rivermont	2.00
R-695	C. SNOW SONG, var. Rivermont x C. BOW BELLS (Reverse cross) A pure white to bloom in the fall. This should be a very interesting cross. The exquisite shape and beauty of C. Bow Bells is well known. C. Snowsong, var. Rivermont noted for its leathery texture was large for its type having petals $1\frac{1}{2}$ " wide with a 5" spread. The spike bore 7 flowers, and it is expected that the resulting hybrid will inherit some of the floriferousness of this parent.	

SEEDLINGS IN INDIVIDUAL POTS

<u>CROSS NUMBER</u>		<u>POT SIZE</u>	<u>PRICE PER PLANT</u>
X-100	Lc. JANE DANE, alba x C. gigas, F.M.B. This summer flowering white with colored throat gained high popularity when offered previously. The parentage of Lc. Jane Dane is Lc. Britannia, alba x Lc. President Wilson, alba.	3" $2\frac{1}{2}$ "	\$6.00 4.50
X-102	C. S.E. ENDICOTT x C. CLEMENTINE GOLDFARB Fall blooming pure white. A good grower producing well shaped flowers of good texture.	4"	12.50
X-103	C. TRENTINO x C. MYRA PEETERS A winter blooming pure white.	4"	15.00

<u>CROSS NUMBER</u>		<u>POT SIZE</u>	<u>PRICE PER PLANT</u>
X-104	LC. OPHIR (C. Dowiana x L. xanthina) A small yellow of good texture to bloom in the winter. Golden yellow petals with rose lip and gold veined throat.	4"	\$10.00
R-408	C. CELIA x C. CLEMENTINE GOLDFARB A fall blooming pure white. Both parents have good blooming records, and are fine pure whites with yellow throat. C. Celia is noted for its broad petals and snug shape.	3½"	9.00
R-458	C. DECEMBER SNOW x BC. GATTON LILY, alba Large Brasso to bloom in the winter. Wide lip with attractive fringed edge may be expected in some.	2½"	5.00
R-468	C. EDITHIAE x C. LADY VEITCH, var. Rivermont A heavy textured pure white with lip having ruffled edges and the throat a yellow center. Expected to bloom in the winter.	2½"	5.00
R-506	(C. HARRISONIAE x C. EMPRESS FREDERICK) x C. MINUCIA The resulting hybrid should produce small (4" to 5") flowers of an unusual type. Both parents were a lovely shade of pink, having yellow tipped lips. Fall blooming.	1 3/4"	2.00
R-515	C. HELEN LANGLEY, alba, fine var. x BLC. AMIDA, fine var. C. Helen Langley, alba was purchased from Charlesworth in England with seed pod. We have seen this plant in bloom. The heavy textured, well formed flowers were pure white and the lip was ruffled.	2½"	5.00
R-524	BLC. XANTHEA, fine var. x BLC. DOROTHY DRURY LOWE, fine var. We expect a fine medium size very heavy textured yellow with a rose lip from this cross. August-September bloomer.	1 3/4"	3.00
R-526	LC. CANHAMIANA, alba x C. ALBERTO TOSELLI Variable shades of lavender with dark lips to bloom in the late winter and early spring is expected here.	1 3/4" 2"	2.50 3.00
R-554	LC. SNOWDRIFT (C. Annette, var. Princess Mary x Lc. Cynthia) A repeated cross on one of our best white with colored lips. Lc. Snowdrift has wide petals and snug form, having a very dark purple lip. Blooms in late fall.	1 3/4"	2.50
R-585	C. MOSSIAE WAGNERI x C. MINNEHAHA, F.C.C. The albino type of C. Mossiae known as C. Mossiae Wagneri is a late type of C. Mossiae, blooming in May or June. The C. Minnehaha parent blooms in December. This mating combines two parents of fine form to give pure whites in late winter and early spring.	1 3/4"	2.50

CROSS NUMBER	POT SIZE	PRICE PER PLANT
R-801	1 3/4"	2.00
O. ROSSIAH x C. TRIANAE, Grand Monarch O. Trianae, Grand Monarch has large dark flowers with a dark label. A good type of O. Rossiah was employed in re-making this cross, O. Trianae, which gives lavender flowers on vigorous plants during February and March.		
R-808	1 3/4"	2.25
O. RICHARDS x C. DECEMBER SNOW C. Richards, (C. Coenanthus x C. Rossiah Wehrh.) This very flowering pure white with heavy petals and sepals. The lip is white with yellow center. C. December Snow, (C. Richards x C. Trianae, also) is December flowering with large petals and sepals. The lip is white with a yellow center. The flowering of this pure white will peak in February.		
R-817	1 3/4"	2.50
O. KESTLE, also x C. MINNAPPA, R.C.C. This is a composite cross to R-808 and is expected to yield flowers of the same quality and season. The very flowering C. Kestle employed is C. Coenanthus x C. Richards. The provide fine pure white in late winter. A most vigorous grower.		
R-824	1 3/4"	2.00
R.C. MALVERN x R.C. THURGOODIANA An excellent growing yellow cross expected to bloom in the fall. Petals and sepals should be golden yellow with dark purple lip.		
R-828	1 3/4"	2.00
C. HAWKMAN, also x R.C. CARAVAN A canary yellow with rose colored lip is expected here and should bloom in the fall. A very vigorous grower.
